Subject: Re: IR Security and Safety Solutions FCC ID: P2GPROXIF

- 1) New form 731 has been sent.
- 2) A fresh battery was used for testing.
- 3) The magnetic loop antenna was rotated to fully maximize each emission.

Regards,
Mike

Subject: IR Security and Safety Solutions FCC ID: P2GPROXIF

Hi Mike,

Our reviewers have identified the following issues:

1. Grantee code P2G is assigned to Locknetics not IR Security and Safety Solutions as shown on the form 731.
2. Please confirm a new battery was used during the testing.
3. Please confirm that the loop antenna was rotated to maximize emissions.

Best regards
