

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device, specifically the battery and the main board, placed next to a ruler for scale. The battery is a cylindrical cell with a red and black wire connected to it. The main board is a small, dark, curved component. The ruler shows measurements in millimeters and centimeters.
EUT Housing and Board View 2	 A photograph showing the internal components of a device, specifically the battery and the main board, placed next to a ruler for scale. The battery is a cylindrical cell with a red and black wire connected to it. The main board is a small, dark, curved component. A small, gold-colored USB connector is also visible next to the main board. The ruler shows measurements in millimeters and centimeters.

EUT Housing and Board View 3	 A photograph showing the internal components of a black plastic mouse housing. The yellow printed circuit board (PCB) is visible, featuring various electronic components including a microcontroller, capacitors, and a USB connector. Two red wires are connected to the board. The assembly is placed on a blue textured surface next to a black ruler with white markings for scale.
Solder Board-Component View 1	 A close-up photograph of the yellow PCB component, showing the soldered connections of various electronic components. The components include a microcontroller, capacitors, and a USB connector. The board is placed on a blue textured surface next to a black ruler with white markings for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a 2.4G antenna, mounted on a blue textured surface. The component is irregularly shaped with several solder joints and a central circular feature. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters (0 to 100 mm).
Antenna View	 A photograph of the same green PCB component, showing the antenna structure. A red box highlights a specific area on the right side of the component, labeled "2.4G Antenna" with a red line pointing to it. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters (0 to 100 mm).
