

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the white plastic housing, which is open to reveal a green printed circuit board (PCB) mounted inside. To the right of the housing is the white plastic lid, which is also open, showing its internal structure and four small blue screws. A black L-shaped ruler with white markings in millimeters is placed next to the components for scale. The background is a blue textured surface.
EUT Housing and Board View 2	 A photograph showing the disassembled components of an Electronic Under Test (EUT) from a different perspective. The white plastic housing is open, revealing a circular copper-colored coil or inductor mounted on a small board. To the right is the white plastic lid, which is open, showing its internal structure and a small red wire. A black L-shaped ruler with white markings in millimeters is placed next to the components for scale. The background is a blue textured surface.

Solder Board-Component View 1	 A photograph of a small, green, curved printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm. The component is oriented horizontally, with its curved edge facing right. It features several small electronic components, including a USB connector on the left side and various surface-mount components.
Solder Board-Component View 2	 A photograph of the same green, curved PCB component from a different angle. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm. The component is oriented horizontally, with its curved edge facing right. It features several small electronic components, including a USB connector on the left side and various surface-mount components.

Solder Board-Component View 3	
Solder Board-Component View 4	

Solder Board-Component View 5	 A circular electronic component, likely a microcontroller or sensor, is shown against a blue background. The component is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the component's dimensions are approximately 25mm by 25mm. The component itself is dark with various gold-colored pads and small components visible on its surface.
Solder Board-Component View 6	 The same circular electronic component is shown from a different perspective, possibly the underside or a different angle. It is again placed next to the same black L-shaped ruler for scale. The component's surface appears more reflective and shows some internal structure or soldering details.
