Columbia, MD 21046

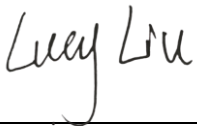

SUBJECT: Application for Class II Permissive Change for FCC ID: ZMONL668AM00

The product, LTE module, has been original granted by FCC dated 11/29/2018 under FCC ID: ZMONL668AM00. This application is based on FCC ID:ZMONL668AM00 C2PC granted by FCC dated 10/15/2020.The intention of this application is to enable the modular certified FCC ID: ZMONL668AM00 to be integrated in Samsung Notebook Computer/ Model: XE345XDA.

Based on the original module application, this application disabled some frequency bands by software
Support band for ZMONL668AM00 : WCDMA B2,4, 5 / LTE B2,4,5,12,13,17,66,71
Support band for series model:
XE345XDA-MA1TM: WCDMA B2,4 / LTE B2,4,5,12,66,71

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: ZMONL668AM00 was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna with lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

Sincerely,

Lucy Liu
