

Statement

We **Quectel Wireless Solutions Co., Ltd** declare the following models.

Product Name: LTE Cat M1 & Cat NB1 Module

Model Number: BG950A-GL, BG952A-GL

BG950A-GL and BG952A-GL share the same chipset baseline, the same hardware and software design, and also support the same frequency bands. The only difference is that BG952A-GL supports QuecOpen[®] for secondary development while BG950A-GL do not support.

Module	BG950A-GL	BG952A-GL
QuecOpen [®]	N/A	Supported

QuecOpen[®] is a software SDK for our customer to develop their own application and running in BG952A-GL module. Applications based on QuecOpen[®] will run independently and do not have any interface to affect modem. Thus, all the performance of module will be the same as BG950A-GL.

BG950A-GL and BG952A-GL share the same firmware baseline, and secondary developed firmware based on QuecOpen[®] will be flashed on customer side.

Your assistance on this matter is highly appreciated.

Sincerely, 

Name: Jean Hu
