To Whom It May Concern,

Regarding the FCC ID label placement for this application, Tekk International wishes to place the label inside the battery compartment in plain view. This location will offer and ensure the end user opportunity to view the label before operation. The identifier label will be readily viewable each time the battery is removed or replaced. The equipment is sold without the battery installed, offering the end user full view and exposure to the label prior to "power on" and operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

This placement is necessary due to the small size of the device and the need to protect the label from abrasion and common hazards such as salt water and corrosive chemicals.

Sincerely,

A handwritten signature in black ink that reads "David W. Stubbs".

David W. Stubbs
President
Tekk International Inc.
