RF 2.4GHz Device	Bluetooth Device	USB

RF and Bluetooth pairing

	RF 2.4GHz Receiver	BT device
STEP1	Turn ON the power switch on the underside of the keyboard	
STEP2	Plug the RF receiver into the host	Ensure Bluetooth SETUP dialog boxes are CLOSED before starting the Bluetooth pairing
STEP3	Hold Fn +  for 3 secs	Hold Fn+  for 3 secs
STEP4	 LED blinks	 LED blinks
STEP5	Pairing succeeded	OPEN Bluetooth SETUP dialog box on the target host, and search for new BT device
STEP6	/	"WE108" found on the BT list
STEP7	/	Pairing succeeded

Switch to RF mode

	RF 2.4GHz Receiver	BT device #1
STEP1	Turn ON the power switch on the underside of the keyboard	
STEP2	plug the RF receiver into the host Hold Fn +  for 1 sec	Hold Fn+  for 1 sec
STEP3	 LED blink once	 LED blink once
STEP4	RF mode ready	"WE108" ready

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
