ATTN.: Reviewing Engineer

IC: 12649A-BEHT3AD  
Model Name: C020 BLE  
HVINs/Models: ES3016, ES3022, ES3026

The ES3022 and ES3026 have identical circuit design, PCB layout, shielding and interface and only the plastic housings have slight variations for their installation on different scales. Only the model ES3016 is different. This model is a stripped-down version and is missing an interface PCB. Therefore, this application can be regarded as identical in performance to the submitted test sample.
