

Declaration

The differences between transmitters FT0313HDM and FT0314HDM:

As shown in the picture, there is only a difference in the red circled position on the front cover between the two models:

FT0313HDM circled position is blank, no operation button. FT0314HDM has a "COLOR TEMP" button in the circled position, which means that FT0313HDM has one less button than FT0314HDM. The PCBA inside the two transmitters is completely the same with no difference.
