

Corning Optical Communications LLC

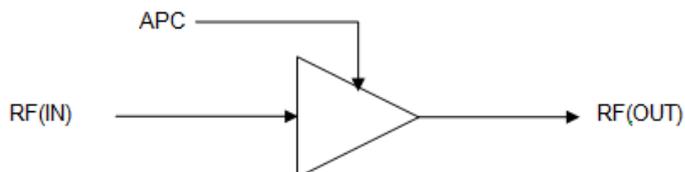

Power Tune up Procedure

1. The Camera is calibrated follow modulation mode.

Mode	Frequency Band (MHz)	Target Power
BS	1930MHz to 1995MHz	32±2dBm
repeater	1930MHz to 1995MHz	32 ± 2dBm

2. Calibration of module transmission power

Modules within a PA as below:

There is a transmission power table about PCLS and APC_DAC, by adjusting the voltage value of the APC, to change the transmission power.
