

Aluminum shell side

Aluminum shell on the back

Code rules for serial numbers

22200-10-21F00001

SKU no.      year      Serial number      Month (A for January, B for February, C for March..... And so on)

Version number (the first batch of mass goods is 10, and it will be updated later if there are changes)

Note: The year and month are based on the actual production time, and the year is a two-digit number. For example, 2018 is "18", and the month is represented by capital letters. The serial number is accumulated for each batch.

- Technical Requirements:
- 1. Radium carving should be clear, no word, rough edge, paste edge and other bad;
  - 2. Tolerance value is  $\pm 0.1\text{mm}$
