

## **DFS Client Declaration Letter**

Date: 2019/09/ We have declar	ared below featur	ed for device,			
Client witho	e Radar detection out radar detection ssive Scanning, a	n capability	ess point capabil	ity	
Frequency	Scanning Plan	Ad Hoc Mode	Access point	WiFi Direct	WiFi Direct
Band (MHz)		Capability	Capability	Group Owner	Group Client
2412 - 2462	Active	Yes	Yes	Yes	Yes
5180 – 5240	Active	Yes	Yes	Yes	Yes
5260 – 5320	Passive	No	No	No	No
5500 – 5580	Passive	No	No	No	No
5660 – 5700	Passive	No	No	No	No
5745 - 5825	Active	Yes	Yes	Yes	Yes
<ul> <li>(3) Country code selection capability to end user- ☐ Yes, ☐No</li> <li>If yes, please explain how it was implemented: (please also help to provide detail of options for each country selection)</li> <li>(4) Transmission in 5600 MHz to 5650 MHz is notched - ☐ Yes, ☐No</li> <li>(5) Meet Part 15.202 requirement - ☐ Yes, ☐ No</li> </ul>					
A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices.  A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network.					
scanning in so classes or thos operations thro	me and passive sethat operate or ough software, the or hardware is im	scanning in other n non-DFS freque e application mus	rs) in different bar encies) or modula st provide softwar	ar devices which re and operations	nt modes (active multiple equipment configure the modes of description on how the s cannot be modified by

software was controlled).
