

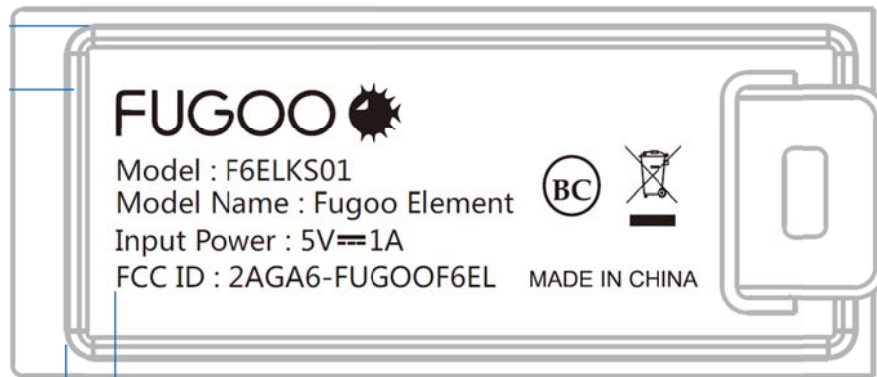

## EXHIBIT 1 - PRODUCT LABELING

---

### Proposed FCC ID Label Format

**Specifications:** Text is black in color and justified. Labels are printed in indelible ink on permanent adhesive silk-screened onto the EUT or shall be affixed at a conspicuous location on the EUT.

Because the material in other parts of the product is not suitable for placing label, label is placed on the I/O interface cover. The user must open this cover when charging. The cover is easily to open to ensure that the label will be readily visible at the time of purchase

### Proposed Label Location on EUT

FCC ID Label Location
