RE: FCC ID: APYNAR0055_ATCB001065

Attention:

I have a few comments on this Application.

1. Please note that on pages 16, 24 and 31 of the report are not clear if the actual values are EIRP as required. While you give a procedure for substitution measurements, it appears that the actual numbers are only calculated from radiated field strengths. Please note that EIRP is to be measured, not calculated. Please provide the substitution antenna gain factors and please show the actual measurement values including all transducer factors involved in antenna substitution measurements.
2. FYI – Please note that band edge compliance only need be shown for the highest and lowest channel in the PCS band.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
