Applicant: Airtronics Inc

(1) The radio equipment Model MX-3 is a 3 Channel Frequency Modulated Radio Control transmitter. The operating frequency of the transmitter can be any one channel in the 75.41-75.99MHz Remote Control frequency band. There are no controls or levers accessible to the user that can change the operating frequency. The MX-3 is used for remote control of ground units such as model cars and boats. The operating power of the MX-3 is 12VDC from either 8 AA alkaline dry cells or an 8-cell NiCd Pack.

(2) Refer to Exhibit - Updated FCC Report
