Bill,

For your questions:

- 1) Has been re-submitted.
- 2) Has been re-submitted.
- 3) The photo was took in the OATS, the room you see is not the shielding room. The material of the wall is FRP which is almost transparent for radio wave. The NSA performance of this site is acceptable for FCC.
- 4) Not only three orthogonal planes, we search the peak reading of almost the semi-spherical plane.
- 5) We will do so. Thank you.

Alan
