RE: Airspan Networks, Inc.

FCC ID: 2ABZJ-100-00107

IC: 11823A-100107

ATCB024637

Please note that, per Section 15.101(a), the digital device portion of the EUT (i.e., the digital circuitry not directly related to the transmit function) is subject to either certification (separate from the NII certification – it would be a composite device together with the NII radio, and require a separate test report only including the digital emissions below 1 GHz), or SDoC. Please indicate which type of authorization will be used for the digital device portion of the EUT. If certification will be used, please submit the new, separate test report (and note that there will also be an additional charge for this). If SDoC will be used, please note that the info to the user required by Section 2.1077(a) must be included in the User's Manual provided with the device by the time that it is marketed, or on a separate sheet included with each device.

The digital portion of the device is being set forth as a Self-Declaration of Conformity, the installation manual has been updated to include the necessary SDoC statement.
