Columbia, Maryland 21046

**Subject: Application of rule §27.50(h)(2) "user station" transmit power
for FCC ID: PIDAU545ENB25 when deployed in AU545**

The device is mains powered and designed to be installed on window sills and similar locations, so is not a "mobile station", but is an "other user station"

(h) The following power limits shall apply in the BRS and EBS:

(2) *Mobile and other user stations.* Mobile stations are limited to 2.0 watts EIRP. All user stations are limited to 2.0 watts transmitter output power.

The device can therefore be installed in this application without antenna gain being considered as part of compliance with 27.50 and 2.1046.

Yours Sincerely

Charlie Blackham
Director
