MSP-A-10171 -CLASS OF 81 OWNERS MANUAL (FNG)

ENJOY A SAFE GAMING ENVIRONMENT	PROBLEM	POSSIBLE CAUSE	SOLUTION
e use the wall anchor kit that is included with the product.	Game will not turn on.	-Power cord is not plugged into wall outlet. -Wires/Plugs are hooked up incorrectly. -ON/OFF Switch is in the OFF position. -Upload switch on back of monitor is in the OFF position.	-Make sure power cord is plugged into the wall outlet and there is power to that outlet. (Plug other electrical equipment into the power outlet to make sure the outlet normally works.) -Make sure all Wires/Plugs are properly connected and all the way set in a directed in assembly instructions. -Slide ON/OFF Switch located on control deck to the ON position. -Slide upload switch on back of monitor to the ON position.
	Game will turn ON, but there is no sound.	-Wires/Plugs were hooked up incorrectly. -Volume Switch is in the OFF position.	-Make sure all Wires/Plugs are properly connected and all the way set in as directed in assembly instructions. -Slide Volume Switch located on control deck to the right. NOTE: Push volume slide switch right to increase volume, left to lower volume.
	You hear sound but there is no picture.	-Wires/Plugs were hooked up incorrectly.	-Make sure all Wires/Plugs are properly connected and all the way set in as directed in assembly instructions.
Servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are	The game screen is frozen.	-The game encountered a problem when processing the data.	-Turn the ON/OFF switch OFF and then back ON again. -You may need to RESET the game. Turn the ON/OFF switch to the OFF position. Unplug the game from the wall outlet and wait 60 seconds to RESET the game. Plug the game back in and turn the ON/OFF switch back to ON.
	Marquee / Light Up Deck Protector will not light up.	-Marquee / Deck Protector power cord is not plugged in at the back of the monitor. -Marquee / Deck Protector power cord is plugged into the wrong input.	-Make sure all Wires/Plugs are properly connected and all the way set in as directed in assembly instructions.
WARNING us or fatal crushing injuries can occur from furniture tip-over. Ip prevent tip-over:	The game screen looks pixelated or there are lines running through the image.	-Wires/Plugs were hooked up incorrectly.	-Make sure all Wires/Plugs are properly connected and all the way set in as directed in assembly instructions. -You may need to RESET the game. Turn the ON/OFF switch to the OFF position. Unplug the game from the wall outlet and wait 60 seconds to RESET the game. Plug the game back in and turn the ON/OFF switch back to ON.
p Arcade1UP on a level floor. r allow children to climb or hang on product.	One of the buttons on the control deck is stuck in the down position.	-Debris may have gotten between the button and the button housing.	-Take something thin (like a business card) and place it between the button and the button housing and slide it back and forth to loosen the debris.
ys set up an anti-tip device!	You are not able to scroll through the games on the game selection menu.	-You may be using the wrong joystick or pressing the incorrect buttons to scroll through the games.	 -Look at the game control section in the instruction manual to make sure you are using the correct joystick or pressing the correct buttons to scroll through the game selection menu.
tip-over restraints may only reduce, but not eliminate, the tip-over.	You are able to scroll through the games on the game selection menu, but you can't enter a game to begin playing.	-You may be pressing the wrong button to enter the game.	-Look at the game control section in the instruction manual to make sure you are pressing the correct button to enter the game.
RNING: Arcade1UP assumes no liability for improper installation	You have entered the game, but you can't get the game to start.	-You may be pressing the wrong button to start the game.	 -Look at the game control section in the instruction manual to make sure you are pressing the correct button to start the game.
RNING: Arcade1UP assumes no liability for improper installation accessive loads placed on screws or bracket. Is wall anchor is not a substitute for proper adult supervision. Sure to locate your Arcade1UP on a flat surface	You have entered the game, but you can't exit the game to get back to game selection menu.	-You may be pressing the wrong button to exit the game. -You may not be holding down the exit button long enough.	 -Look at the game control section in the instruction manual to make sure you are pressing the correct button to exit the game. -Make sure you are holding the exit button down for 5 seconds to exit the game.
DIATION EXPOSURE STATEMENT: t complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed with a minimum distance of 20cm between the radiator and any part of your body.	The control functions that are printed on the control deck do not match the gameplay on the screen for the game you are playing.	-You may be pressing the wrong game control buttons for the game you are playing.	 -Look at the game control section in the instruction manual to make sure you are pressing the correct game control buttons for that game. -Look at the game control loading screen on the monitor to make sure you are pressing the correct control buttons. (NOTE: The game control sthat are printed on the control deck are only for the feature cabinet game. The other games in the cabinet will utilize the same buttons but react differently.)
DIATION EXPOSURE STATEMENT: omplies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be ated with a minimum distance of 20cm between the radiator and any part of your body.	The game will not let me select 2 or 3 players for a chosen game.	-The game may only be a 1 or 2 player game.	-Refer to the game control section in the instruction manual to see how many players are able to play that game.
