DECLARATION

Date: 2018-10-22
FEDERAL COMMUNICATIONS COMMISSIONS
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

The baseband module from SEMCo, called W26. installed in our product WPON(model number: WPON AP-Ext-DC, FCC ID:2ADZR7577WPONAPED).We only used some ports of this module to achieve the function what we want.

We have two procedure to disable the other ports:

1, the antenna cable was connected to the used ports before deliver to customer, and customer is not allowed to open AP-Ext-DC as the special screw was adopted.

2.For the W26 (Baseband modules), they are configured by software with the correct ports. The module used in our product, only the port 1,2 and 3 can use, the other port not activated.

For WPON AP-Ext-DC, the port 1,2 and 3 of module are connect to antennas

Ant 0 will be connected to Port 1, Ant 1 will be connected to the Port 2, and Ant 2 will be connected to Port 3. the antenna was connected to the corresponding ports before deliver to customer,customer is not allowed switch connection order.

Sincerely,
