## INSTRUCTION MANUAL

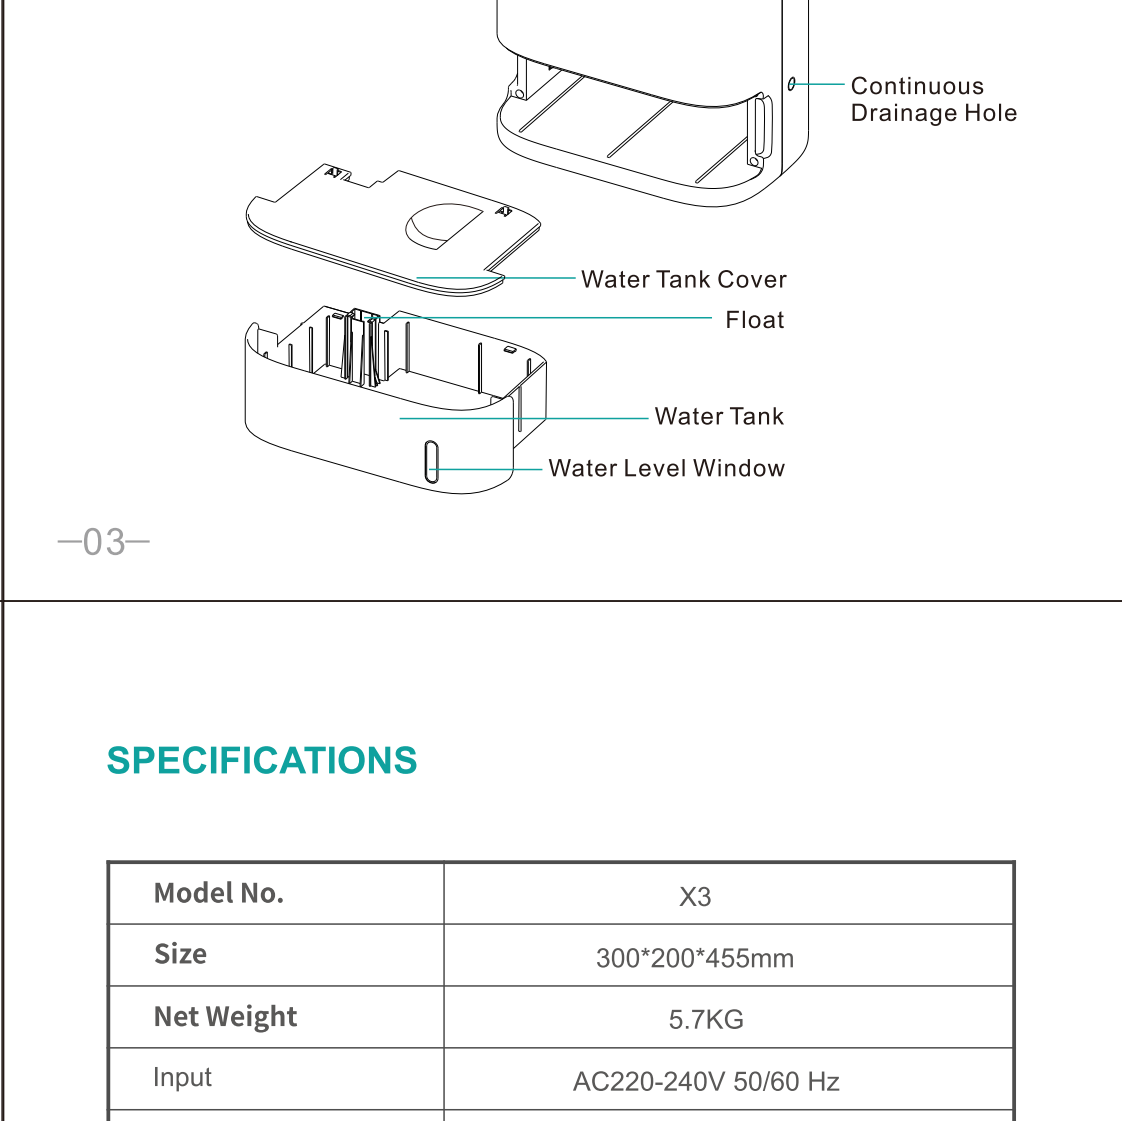

### DEHUMIDIFIER

Model X3

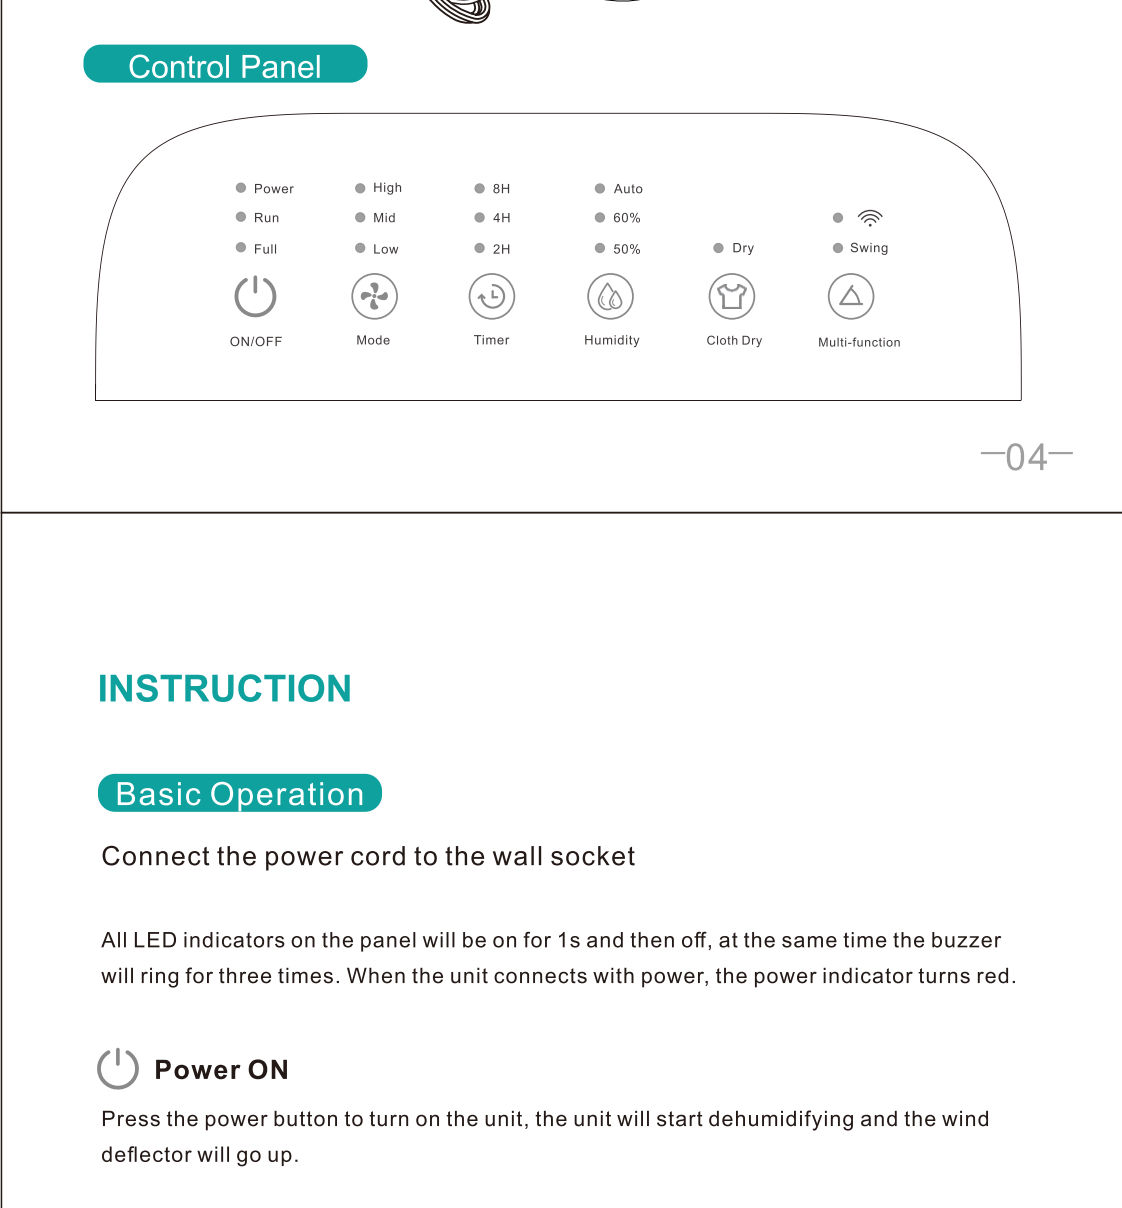

X1

- POINTS FOR ATTENTION**
- Before using, please read this user manual carefully and keep it for future reference.
- Safety Warning**
- To avoid electric shock and fire, do not allow water, liquid or any flammable detergent to get into or to clean the product.
  - Do not spray insecticide, perfume or other flammable spray around the product.
  - If power cord is damaged, in order to avoid danger, it must be replaced by professional staff.
  - Please stop using if the plug, power cord or product is damaged.
  - Keep the air inlet/outlet free from being blocked.
  - Ensure the foreign body does not enter the product through the air inlet.
  - Handle with physical or mental disability, or without relevant experiences and skills (including children) should use it under guiding and instructing.
  - Ensure the power socket is well connected with plug. If not, the plug will be hot.
  - Do not place any item above the product.
  - Ensure the product is used and kept in a well-ventilated area.
  - Leave at least 30cm of space on the back and sides of the product, and at least 50cm of space above the product when using.
  - Do not place the product under air conditioner to prevent condensation water dropping into the product.

**SPECIFICATIONS**

Model No.	X3
Size	300*200*455mm
Net Weight	5.7KG
Input	AC220-240V 50/60 Hz
Power	650W
Volume	2.5L
Working Capacity	7L/D (30°C 80% RH)
Operating Temperature	-10~50°C
Coverage area	< 40m <sup>2</sup>

- INSTRUCTION**
- Basic Operation**
- Connect the power cord to the wall socket
- All LED indicators on the panel will be on for 1s and then off, at the same time the buzzer will ring for three times. When the unit connects with power, the power indicator turns red.
- Power ON**
- Press the power button to turn on the unit, the unit will start dehumidifying and the wind deflector will go up.
- Power OFF**
- Press the power button again to turn off the unit, the power indicator turns red, and other indicators will be off. The unit will keep working for 4 minutes then turn off, and the wind deflector rotates down to its original position.
- Notice:** The machine can record the dehumidify mode and humidity mode of last time
- 4. Cloth Dry Setting**
- Press the cloth dry button, the unit will work with strong mode, user could set timer and humidity, but the function of dehumidification can't be set. If the unit doesn't work under timer, the unit will keep working for 10 hours and then stop for half an hour, then it will restart automatically.
- 5. Swing Setting**
- In the condition of working, the position of the wind deflector could be controlled by the fan setting button. Press fan setting button could set the wind deflector between swing and stop status. The wind deflector can swing or stop at any angle within 70 degrees.
- 6. Anti-dump protection**
- There is an anti-tip switch inside the machine. When the whole machine is tilted beyond a certain angle, the machine will automatically disconnect the power. Protect the machine and ensure the safety of the machine.
- 7. Works with Smart Life APP**
- (1) **Download & Registration**
- Scan the QR code to download "Smart Life" APP. You can also search "Smart Life" in either APP store or Google Play to install the APP.
  - Open the "Smart Life" APP, tap "Register" to register a "Smart Life" account with your phone number or E-mail. Then sign in the APP.
- (2) **Add Devices in Easy Mode (Recommend)**
- Make sure your smart device is integrated and your mobile phone is connected to your Wi-Fi network. If the WiFi indicator of smart device keeps flashing to indicate that the smart device enters the mode of configuring the mobile phone. If not, please long press the Multi-function button for more than 7 seconds, after hearing the smart device "beep", then lose it and this means the device is already for configuration.

-08-

- Button Operation**
- 1. Mode Setting**
- Press the mode button to adjust the wind speed among Low, Mid and High mode, the corresponding indicator turns on. Press the button again, it will start from beginning.
- Notice:** When the unit dehumidifies in any humidity mode, user could set wind speed and timer at will.
- 3. Timing Shutdown**
- In the condition of working, press the timer button to set 2h, 4h and 8h timer or cancel. Press again, it will start from the beginning.
- (1) The unit will auto-off when water tank is full even if the unit is timing, and the remaining time will still be recorded. After emptying the water tank, the unit will keep working in remaining hours.
- (2) When the water tank is not full, the function of timing could be set in any timer. If the unit stops working or cut off, it needs to be reset.
- 2. Humidity Setting**
- (1) Press the humidity button to dehumidify under the condition of RH50%, RH60% or Auto, then the corresponding indicator turns on. Press the button again, it will start from beginning.
- (2) When the environmental humidity is lower than the setting humidity, the unit will stop dehumidifying. When the environmental humidity is higher than the setting humidity, the unit will start dehumidifying again.
- Notice:** When the unit is in the status of automatic dehumidification, its operation wouldn't be affected by the change of environmental humidity.
- 4. Q & A**
- Why failed in adding device?
- Make sure the device is powered on and close to your mobile phone when adding device.
  - Make sure your mobile phone is connected to the WiFi network and your Wi-Fi router is working properly.
  - Make sure the device is ready for configuration. Please refer to the Product Instruction "Add Devices in Easy Mode" or "Add Devices in AP Mode" for details.
- Now you can control your smart device via your mobile phone APP anytime and anywhere (Make sure your mobile phone and smart device are all connected to the network). You can share your devices with your friend or family after you add your devices successfully.
- 4. Q & A**
- Why failed in adding device?
- Make sure the device is powered on and close to your mobile phone when adding device.
  - Make sure your mobile phone is connected to the WiFi network and your Wi-Fi router is working properly.
  - Make sure the device is ready for configuration. Please refer to the Product Instruction "Add Devices in Easy Mode" or "Add Devices in AP Mode" for details.

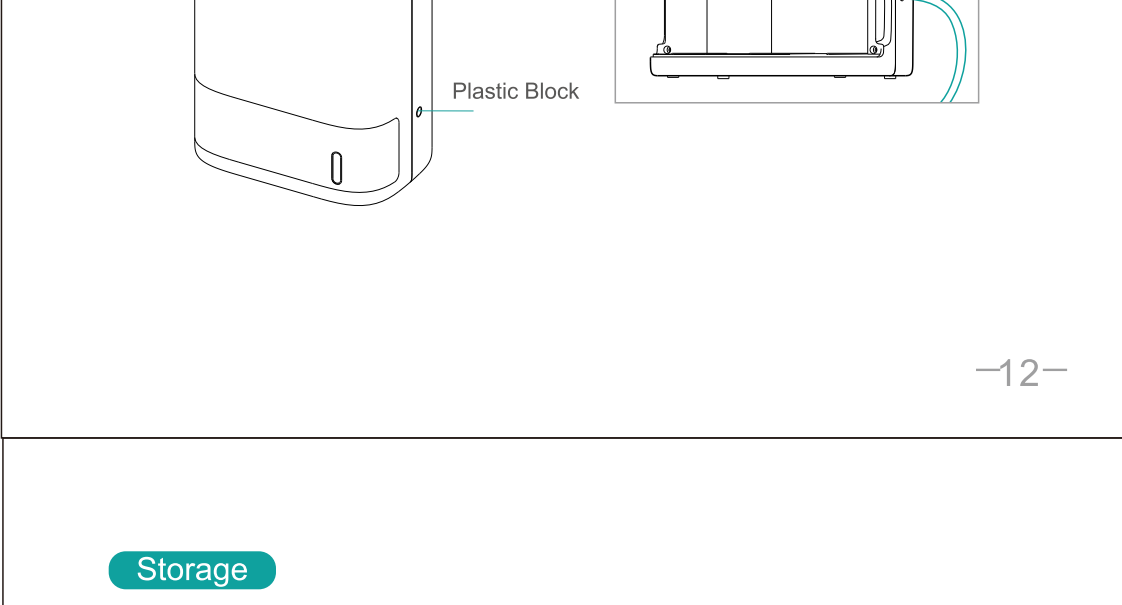

-09-

- 4. Make sure the connected devices have not reached the maximum number of WiFi router. If not, please disconnect the network of some devices.**
- 5. Make sure password of the Wi-Fi network is correct when adding new device.**
- 6. Make sure you have not used any Chinese Characters to name your WiFi network.**
- (5) Can I control device with 2G/3G/4G network?**
- When adding device for the first time, it requires that your mobile phone and device are connected to the same WiFi network. After adding device successfully, you can remote control your device with 2G/3G/4G network.
- (6) How can I share my device with others?**
- Open your Smart Life APP, select your device and tap the button in the top right corner. Tap "Shared devices" and "Add sharing", then select the "country/region" where the account belongs to and input the "Account number" (a phone number or an E-mail address) you want to share with. (Please make sure the phone number or E-mail is registered.)
- (7) How can I manager the device shared by others?**
- Open your Smart Life and you can operate the device by tapping the product in the "Shared device" (received) on the home page.
- (8) How to remove device?**
- Method 1:**
- Long press the WiFi button for more than 7 seconds, you will hear "beep", it means the device is removed, and the WiFi indicator light begin to flash quickly again.
- Method 2:**
- Open your Smart Life APP, select your device and tap the button in the top right corner. Tap "More" Then tap the "Remove Device" in the bottom, the WiFi indicator light begin to flash quickly again.

-10-

- METHODS OF POURING WATER**
- The water tank has maximum capacity of 2.5L with 7L per day working capacity. When the tank is full, the machine will stop dehumidifying immediately. The full indicator will keep flashing in orange.
- Four Water From Water Tank**
- Turn off the machine, take out the water tank and pour out the water.
- Take out the water tank.
  - Remove the water tank cover.
  - Pour water.
  - Reset the water tank and it will restart.

-11-

-12-

- MAINTENANCE**
- Note**
- Ensure the machine is turn off and unplugged before maintenance.
  - Do not immerse the dehumidifier in water or any liquid.
  - Do not use abrasive, corrosive or flammable cleaners (such as bleach or alcohol) to clean any part of the machine.
- Cleaning**
- Ensure the machine is turn off and unplugged.
  - Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the unit and air inlet/outlet.
  - Notice:** Please don't drop any water into the machine when clean the air outlet.
  - Put out the water tank and open the cover to clean the water tank.
  - If the filter is blocked by dust, the dehumidification effect will be weaken. Please clean it twice a week.
  - a. Take out the filter.
  - b. Clean the filter by vacuum cleaner or water and put it in a ventilated place to dry out. Do not put the filter in high temperature or under sunlight to dry out.
  - c. After drying, please install the filter.

-13-

- Storage**
- Ensure the machine is power-off and unplugged.
  - Ensure the water tank is clean and dry.
  - Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air inlet/outlet.
  - After the machine is completely dry out, put on the bag and place it in a cool and well-ventilated place.
  - If you do not use it for a long time, you should turn on the machine for a few minutes from time to time to ensure a good performance.
- FAQ**
- | SITUATION                                 | REASON  |
|---|---|
| No working                                | <ul style="list-style-type: none"><li>Is it plugged into a power socket? Is there a power outage?</li><li>Is the home leakage switch or fuse cut off?</li><li>Is the water full?</li></ul>  |
| Poor performance (less water in the tank) | <ul style="list-style-type: none"><li>Is the filter blocked?</li><li>Is the door closed?</li><li>Is there any obstacle blocking the air inlet/outlet?</li><li>Is there any other equipment releasing steam indoor?</li><li>Is the indoor temperature too low?</li></ul> <p>(the dehumidification capacity will be weaken in a low temperature and humidity environment)</p> |

-14-

<b>The air volume becomes smaller</b>	<ul style="list-style-type: none"><li>Is the filter too dirty so that it blocks the air to enter inside?</li><li>Is the air inlet/outlet of the machine blocked by something?</li></ul>
<b>Significant noise</b>	<ul style="list-style-type: none"><li>Is there anything stuck on the fan in the air outlet?</li><li>Is the machine tilted?</li></ul>
<b>Leakage</b>	<ul style="list-style-type: none"><li>Is the machine tilted or jumped?</li><li>Is there any water in the tank when moving the machine?</li><li>Is the floating ball in the water tank full off?</li></ul>
Still working after power off	The unit continues working for 4 min after power-off, this process is the delaying work setting to make the hot air come out fully. It is a normal phenomenon to protect the machine.
The coming out noise with small	When the temperature is high between heat exchanger and the cold exchanger, the small will emit temperature. It is a normal phenomenon.

**Notice:** If the above FAQ can not solve your problems and need maintenance, please contact the supplier or after sales service center. Please do not disassemble the machine to maintain by yourself.

FCC Warning:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device must not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

**Notice:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
