(M) MOTOROLA

September 29, 2006

Motorola authorizes DSC Toronto with their certified test lab (NEMKO CANADA INC) to use the g20 PC4 documentation supplied by Motorola for testing and certification of DSC Toronto on behalf of BENTEL SECURITY s.r.l.'s GS3055-1 for FCC and IC requirements.   Documents supplied for use includes, test reports and the actual Motorola exhibits used for the g20 PC4 FCC submission, which were supplied under NDA.

The following exhibits may be used for the filing with the FCC, but you must protect the confidentiality of the info in your filing process. DSC Toronto and their test lab must request confidentiality with FCC when submitting the three exhibits below.

Exhibit 4 Block diagram
Exhibit 5 Schematics
Exhibit 12 Operational Description.

NEMKO CANADA INC representing DSC Toronto in submitting for FCC and IC approval of the GS3055-1 and may use supporting documents supplied by Motorola on the Motorola g20 PC4 data module including test reports, and exhibits and is authorized to use the company name "Motorola", product name "g20 PC4" and software version number "0C.04.76R" solely for the certification process of DSC Toronto GS3055-1 product which has the Motorola g20 PC4 data module embedded.

Sincerely,

Steve Gump
Engineering Manager
OEM Embedded Modules
