TUV SUD BABT FCB
Octagon House,
Segensworth Road,
Fareham, Hampshire,
PO15 5RL

Gentlemen:

Please find enclosed a request for certification of a Patient Reader, FCC ID:LF525000, that is part of a Medical Communications System.

Due to physical size constraints, space limitations on the bottom of the label, and numerous regulatory label requirements, it does not permit all required language on the label in a legible form. Medtronic requests permission be given to locating the Part 2 and Part 15 warning statements in the instruction manual. The FCC ID will appear on a label on the equipment.

Should you have any questions pertaining to this matter, contact Janet Gavidia. She can be reached at the number and address given here.

Janet Gavidia
