Product instructions

Connection pairing:

First use: When the EIPro is turned on, the blue flashing indicator light indicates pairing mode. Your phone or Bluetooth device can search for EI Pro pairing connection in Settings - Bluetooth;

Change the connection device method:

1. Turn off Bluetooth from the phone settings, and the page flipping E1Pro will automatically enter pairing mode. For new devices search for E1 Pro in Settings - Bluetooth and click on pairing

frequently asked question Q: What is the pairing name for the remote control? I A . E1 Pro

Q: How to check the remote control battery level?

A: 1. After connecting Bluetooth on an Android phone, the battery level will automatically display.

2. After connecting an Apple phone to Bluetooth, swipe the phone screen to the right to display the battery level.

3. After downloading hart.Limba APP, connect Bluetooth and the battery level will be automatically displayed on the APP display.

I O: The remote control cannot turn on

A: When encountering the inability to power on, please first use a 5V/IA charging head or computer USB to charge the remote control for about 1 hour, and then try to power on again;

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- •Reorient or relocate the receiving antenna.
- •Increase the separation between the equipment and receiver.
- •Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- •Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
