Subject: HomeLink Certification for CB2R171HL3

Gentlemen:

In reference to Public Notice DA 02-2850A1 outlining the updated certification procedures pertaining to "Learned Mode" or "Trainable" transmitters, Johnson Controls hereby states formally that it's HomeLink product CB2R171HL3 has been tested in accordance with DA 02-2850A1. Further, we declare that there are no end-user adjustable parameters available in hardware or software that would materially affect the RF performance or characteristics of the transmitter.

Johnson Controls is aware that any changes made to the software or hardware requires a new equipment authorization. In the case of HomeLink CB2R171HL3, software changes which have been made to a previously certified model are hereby tested, documented, and reported.

Sincerely,

Thomas R. Olson
