FCC REPORT

| Applicant: | SKY PHONE LLC |
|-------------------------|--|
| Address of Applicant: | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |
| Equipment Under Test (E | EUT) |
| Product Name: | Tablet |
| Model No.: | Elite OctaX |
| Trade mark: | SKY DEVICES |
| FCC ID: | 2ABOSSKYELIOCTAX |
| Applicable standards: | FCC CFR Title 47 Part 15 Subpart B |
| Date of sample receipt: | 13 Aug., 2021 |
| Date of Test: | 13 Aug., to 30 Aug., 2021 |
| Date of report issued: | 31 Aug., 2021 |
| Test Result: | PASS * |

* In the configuration tested, the EUT complied with the standards specified above.

Authorized Signature:

This report details the results of the testing carried out on one sample. The results contained in this test report do not relate to other samples of the same product and does not permit the use of the JYT product certification mark. The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in this report.

This report may only be reproduced and distributed in full. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards.

This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

| Test Item | Section in CFR 47 | Result | | | |
|---|-------------------|--------|--|--|--|
| Conducted Emission | Part 15.107 | Pass | | | |
| Radiated Emission | Part 15.109 | Pass | | | |
| Remark: 1. Pass: The EUT complies with the essential requirements in the standard. 2. N/A: The EUT not applicable of the test item. | | | | | |
| Test Method: ANSI C63.4:2014 | | | | | |

5 General Information

5.1 Client Information

| Applicant: | SKY PHONE LLC |
|---------------|--|
| Address: | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |
| Manufacturer: | SKY PHONE LLC |
| Address: | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |

5.2 General Description of E.U.T.

| Product Name: | Tablet |
|------------------------|---|
| Model No.: | Elite OctaX |
| Power supply: | Rechargeable Li-ion Battery DC3.7V, 4000mAh |
| AC adapter: | Model: SIWY-011 |
| | Input: AC100-240V, 50/60Hz, 0.15A |
| | Output: DC 5.0V, 1000mA |
| Test Sample Condition: | The test samples were provided in good working order with no visible defects. |

5.3 Test Mode

| Operating mode | Detail description |
|-------------------------|--|
| PC mode | Keep the EUT in Downloading mode(Worst case) |
| Charging+Recording mode | Keep the EUT in Charging+Recording mode |
| Charging+Playing mode | Keep the EUT in Charging+Playing mode |
| FM mode | Keep the EUT in FM receiver mode |
| GPS mode | Keep the EUT in GPS receiver mode |

The sample was placed 0.8m above the ground plane of 3m chamber. Measurements in both horizontal and vertical polarities were performed. During the test, each emission was maximized by: having the EUT continuously working, investigated all operating modes, rotated about all 3 axis (X, Y & Z) and considered typical configuration to obtain worst position, manipulating interconnecting cables, rotating the turntable, varying antenna height from 1m to 4m in both horizontal and vertical polarizations. The emissions worst-case are shown in Test Results of the following pages.

5.4 Measurement Uncertainty

| Parameters | Expanded Uncertainty |
|-------------------------------------|----------------------|
| Conducted Emission (9kHz ~ 30MHz) | ±1.60 dB (k=2) |
| Radiated Emission (9kHz ~ 30MHz) | ±3.12 dB (k=2) |
| Radiated Emission (30MHz ~ 1000MHz) | ±4.32 dB (k=2) |
| Radiated Emission (1GHz ~ 18GHz) | ±5.16 dB (k=2) |
| Radiated Emission (18GHz ~ 40GHz) | ±3.20 dB (k=2) |

5.5 Description of Support Units

| Manufacturer | Description | Model | Serial Number | FCC ID/DoC |
|--------------|-------------|-------------------|---------------|------------|
| DELL | PC | PC OPTIPLEX7070 | | DoC |
| DELL | MONITOR | SE2018HR | 3M7QPY2 | DoC |
| DELL | KEYBOARD | KB216d | N/A | DoC |
| DELL | MOUSE | MS116t1 | N/A | DoC |
| HP | Printer | HP LaserJet P1007 | VNFP409729 | DoC |

5.6 Related Submittal(s) / Grant (s)

This is an original grant, no related submittals and grants.

5.7 Description of Cable Used

| Cable Type | Description | Length | From | То |
|--------------------|-----------------------------|--------|------|------------|
| Detached USB Cable | etached USB Cable Shielding | | EUT | PC/Adapter |

5.8 Additions to, deviations, or exclusions from the method

No

5.9 Laboratory Facility

The test facility is recognized, certified, or accredited by the following organizations:

• FCC - Designation No.: CN1211

JianYan Testing Group Shenzhen Co., Ltd. has been accredited as a testing laboratory by FCC(Federal Communications Commission). The test firm Registration No. is 727551.

• ISED – CAB identifier.: CN0021

The 3m Semi-anechoic chamber of JianYan Testing Group Shenzhen Co., Ltd. has been Registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing with Registration No.: 10106A-1.

• A2LA - Registration No.: 4346.01

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 General requirements for the competence of testing and calibration laboratories. The test scope can be found as below link: https://portal.a2la.org/scopepdf/4346-01.pdf

5.10 Laboratory Location

JianYan Testing Group Shenzhen Co., Ltd. Address: No.101, Building 8, Innovation Wisdom Port, No.155 Hongtian Road, Huangpu Community, Xinqiao Street, Bao'an District, Shenzhen, Guangdong, People's Republic of China. Tel: +86-755-23118282, Fax: +86-755-23116366 Email: info-JYTee@lets.com, Website: <u>http://www.ccis-cb.com</u>

| Test results: | Pass | | |

Measurement data:

| Product name: | Tablet | Product model: | Elite OctaX |
|-----------------|------------------|----------------|-----------------------|
| Test by: | Mike | Test mode: | PC mode |
| Test frequency: | 150 kHz ~ 30 MHz | Phase: | Line |
| Test voltage: | AC 120 V/60 Hz | Environment: | Temp: 22.5℃ Huni: 55% |
| | | | |

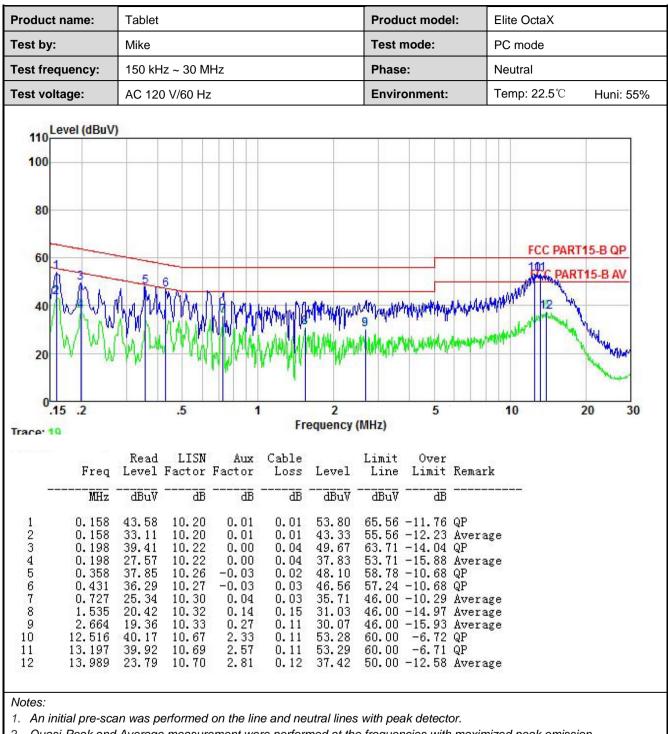

Notes:

1. An initial pre-scan was performed on the line and neutral lines with peak detector.

2. Quasi-Peak and Average measurement were performed at the frequencies with maximized peak emission.

3. Final Level =Receiver Read level + LISN Factor + Cable Loss.

2. Quasi-Peak and Average measurement were performed at the frequencies with maximized peak emission.

3. Final Level =Receiver Read level + LISN Factor + Cable Loss.

6.2 Radiated Emission

| Test Requirement: | FCC Part 15 B Se | ection 15.10 | 9 | | | |
|-----------------------|---|--|------------------------|--|---|--|
| Test Frequency Range: | 30MHz to 6000MI | Hz | | | | |

| | the top of a variable-height antenna tower. |
|-------------------|--|
| | The antenna height is varied from one meter to four meters above the ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement. |
| | 4. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading. |
| | 5. The test-receiver system was set to Peak Detect Function and Specified Bandwidth with Maximum Hold Mode. |
| | 6. If the emission level of the EUT in peak mode was 10dB lower than the limit specified, then testing could be stopped and the peak values of the EUT would be reported. Otherwise the emissions that did not have 10dB margin would be re-tested one by one using peak, quasi-peak or average method as specified and then reported in a data sheet. |
| Test Instruments: | Refer to section 5.11 for details |
| Test mode: | Refer to section 5.3 for details |
| Test results: | Passed |
| Remark: | All of the observed value above 6GHz ware the niose floor , which were no recorded |

Prival Level = Receiver Read level + Anterina Pactor + Cable Loss - Preamplifier Pactor.
 The emission levels of other frequencies are very lower than the limit and not show in test report.
