

MAYFLASH NEW adapter for PS5

Function sample is available.

Short Instruction:

This adapter provides a good solution when you must connect a wired PS4/PS5 controller to your JOYSTICK (Like MAYFLASH F300,F500), or FPS gaming adapter (like MAYFLASH MAX SHOOTER ONE, HAMA Speedshot.) on both PS4 & PS5 system.

Plug & play, no need driver.

It has two modes. LED blue is for PS4 mode, LED white is for PS5 mode.

How to connect :

1. Connect your joystick or FPS gaming adapter that need a wired PS4/PS5 controller to your PS4/PS5 game console.
2. Plug this adapter into the USB slot of your joysticks or FPS GAMING adapter. LED blue is for PS4. LED White is for PS5. Press the mode switch for 3 seconds to change mode you need.
3. Once the joysticks or FPS gaming adapter have been identified successfully, the LED on the adapter will stay lit.

How to update:

1. Download the latest firmware from MAYFLASH official website <https://www.mayflash.com/Support/>
2. Run the software at your windows PC.
3. Press and hold the MODE switch and plug the adapter to USB port of PC.
4. As soon as the adapter has been recognized, select "Update"
5. Do not disconnect the device until you are informed that the updated was completed successfully.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
