RE: Lear Corporation

FCC ID: KOBHL05TPM

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide an exhibit which shows the FCC ID on the device.
- 2) Please be aware that the new version of ANSI C63.4 has been adopted by the FCC and should be implemented as soon as possible.
- 3) Was the device rotated about all 3 axis to obtain worse case? Please confirm.
- 4) Several of the low frequency results (< 490 kHz) appear to be 10.2 dB from expected values. Please provide sample calculations and/or explain as necessary.

Timothy R. Johnson
Examining Engineer
