

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit). The main housing is a dark, oval-shaped metal shell with several screws. A white, oval-shaped plastic cover is placed next to it. A black ruler with white markings is positioned horizontally below the components for scale. The background is a blue textured surface.
Solder Board-Component View 1	 A photograph showing a green printed circuit board (PCB) component. The board is populated with various electronic components, including a large black integrated circuit (IC) and several smaller components. A white ribbon cable is connected to the board. A black ruler with white markings is positioned vertically to the left of the component for scale. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component with a central circular cutout and several mounting holes. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10).
Solder Board-Component View 3	 A photograph of two circular metal components, likely lens covers or housings, placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component on the left is open, revealing internal electronic components, while the one on the right is closed.

Solder Board-Component View 4	 A photograph of a small, dark, rectangular electronic component with a complex circuit of soldered components. A large, square integrated circuit (IC) is visible in the center, labeled '3R3 111 0KD'. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 25 mm and its height approximately 15 mm.
Solder Board-Component View 5	 A photograph of the same electronic component from a different angle, showing the underside. The component is dark and rectangular, with a grid of gold-colored solder pads visible. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 25 mm and its height approximately 15 mm.
