

Ediag Plus

EN

1 Download Ediag App and Login

Search for "Ediag" in the App Store or in GooglePlay Store. The Ediag App is FREE to download. (as shown in the figure below)

(iOS)

(Android)

2 Activate Your Ediag Plus

When you click on any diagnostic function, the following page appears. Click on the "Activate" button in Ediag App. Input the serial number and 8-digit activation code.

3 Insert the Ediag Plus into Vehicle's OBDII Port

As shown below, there are 5 common locations for OBDII port. Insert the Ediag Plus, the device is power on if the light turns green.

4 Connect the App and Device via Bluetooth

After inserting the device into vehicle's OBDII port, open the Ediag app and start the diagnosis. (It will automatically connect with the Bluetooth in the device during the diagnostic process).

Ediag

5 Download the Diagnostic Software

Ediag Plus will automatically download the corresponding software for your vehicle during the diagnostics for the first time. Later, there is no need to download the software again.

6 Home page

Click "OBD fuction" on the home page to enter the OBD function. There are 8 function menus to choose from: Read fault code, clear fault code, read data stream, freeze frame, O2 sensor test, ON-BOARD monitoring, EVAP system.

OBD FUNCTIONS

OBD scan will inspect emission related issues of powertrain.

Click "ALL SYSTEMS DIAGNOSTIC" on the home page to access the all systems diagnosis DIAGNOSTIC function. After entering, you can choose to read VIN information intelligently or choose your own vehicle brand to enter diagnosis.

ALL SYSTEMS DIAGNOSTIC

Enhanced diagnostic for all systems. Read and clear fault codes, read data stream, etc.

7 Different Lights While Using Your Ediag Plus

Continuous red light: The device is power on
Continuous blue light: Bluetooth is connected

KINGBOLEN®

FCC Requirement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

IC Requirement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device must not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1) L'appareil ne doit pas produire de brouillage;
- 2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
