

Wireless Power Bank

User Guide

Name: Wireless Power Bank
Battery model: polymer battery
Product material: ABS+PS
Battery capacity: 5000mAh
Rated capacity: 3000 mAh
Energy conversion: ≥60%
USB output: 18W
Type-c Input: 18W
Type-c output: 20W

Product Description:

This Wireless Charging Power Bank can provide both wired and wireless fast charging to your personal mobile and electronic devices. It's equipped with MagSafe technology which conveniently holds the wireless charger in place once aligned magnetically with compatible phones.

Checking Power Levels:

To check remaining power in the charger, simply press the power switch along the side and check the digital display on the front, the numbers show the percentage of power remaining in the power bank.

Troubleshooting and Safety Info:

1. If you're having trouble with wireless charging, please make sure your phone is Qi compatible and able to be charged via wireless charging. If charging still does not start, try slightly adjusting the position of the product and remove any phone cases, wallets or rings attached to the back of the phone.
2. We strongly recommend using a high quality certified wall adapter to recharge this device. Failure to do so may result in slow charging speeds or product failure.
3. Keep device away from high heat and flammable liquid and gasses. Avoid using in environments above 45 °C and below 0 °C.
4. Keep product dry to avoid short circuits or other damage to electrical components. If this product is dropped or damaged in anyway, please stop use immediately and dispose responsibly. Do not disassemble the product or replace any parts.

Charging This Product:

1. Use a wall adapter and the included charging cable to recharge the wireless power bank as needed.
2. Charging is indicated by digital display.

Charging Personal Electronics:

1. To charge your device via cable, insert one end of your phone's charging cable into either the Type C or USB port and the other end into your phone. Charging should begin automatically.
2. To charge your Qi compatible phone via wireless, start by pressing the power button along the side of the power bank. Then simply sit your phone atop the wireless charging area as shown in the diagrams above. Charging should begin automatically.

Steel Ring-for phones that don't have magnetic attraction

According to each wireless phone charging position, attach ring to the desired position, or adhere the ring onto the phone rubber or plastic protective cover. (Smooth and clean protective covers thinner than 3mm are best for charging efficiency).

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
