User manual

Ultra Thin Wireless Mouse

## **Package contents:**

1\*Wireless mouse

1\*Nano receiver

1.Open the battery case of mouse, insert the battery into the case (pay attention to the positive and negative direction)

Note:Before you use it, please tear the battery insulating protective film.

2.Remove the receiver

3.Insert the receiver into the computer USB interface

## **Product features**

Stable wireless transmission

2.4GHz wireless technology can provide a reliable connection and not subject to any interference in the 360 degree within 15 meters.

Fashion slim

Stylish ultra-thin design, easy to carry.

Than ordinary wireless power-saving five times

The industry's high chip, five times power-saving than ordinary mouse, the standby time up to 24 months.

R250 high rate of return

R250 high return rate, 1600DPI provide accurate positioning.

Roller pulley setting

Roller pulley set, feel comfortable and smooth.

## **Data parameter**

Mouse Basic:

Data transmission:1 Mbps

Frequency: 2402MHz-2480MHz

Channel:16

Engine: No light

Distance:15m

Voltage:1.5V

Current:11mA

Mouse key life: 3 million above

Mouse size: 113\*64\*32mm

Tracking Performance:

Mouse resolution: 1600DPI

Mouse rate of return: 250Hz

Mouse Step Current:

Working current=11mA

Standby current=1.3mA

Dormancy current:50uA

No receiver state< 30uA

#### FCC Information and Copyright

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
