

EXHIBIT 2 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is irregularly shaped with a large central circular cutout. It features various electronic components, including a white integrated circuit (IC) on the right side, several resistors, and a small black component at the top. The PCB is placed on a blue background next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is positioned between the 10 mm and 30 mm marks on the ruler.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the opposite side of the component. It features a large central circular cutout and various electronic components, including a white IC on the right side, several resistors, and a small black component at the top. The PCB is placed on a blue background next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is positioned between the 10 mm and 30 mm marks on the ruler.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', positioned horizontally against a blue background. The component is populated with various electronic components, including integrated circuits, capacitors, and a connector on the right side. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler is oriented vertically on the left side of the image, with markings from 10 to 90 mm visible.
Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', positioned horizontally against a blue background. The component is populated with various electronic components, including integrated circuits, capacitors, and a connector on the right side. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler is oriented vertically on the left side of the image, with markings from 10 to 90 mm visible.
