SKY TS/R-1 Digital Thermostat USER MANUAL

1) Rear Case- press ON/OFF(ON-the back left button, OFF- the back right button)

   at the same time to change C or F

2) Front Case- move rod to OFF then send 3 times OFF signal to receiver

3) Front Case- move rod to ON then send 3 times ON signal to receiver

4) Front Case- move rod between OFF & ON for adjusting desire temperature.

   When temperature below adjusted temperature then it will turn on receiver with

   flame icon after 2 minutes. When temperature higher than adjusted temperature

   then it will disable the flame icon then turn off the receiver. It will have SET icon

   when rod was moved between ON & OFF scale.

The action of SKY TS/R-1

   Use component RT-103AT to sense the temperature and compare with ROD SETTING temperature which setting by users. When setting temperature below the room temperature then transmitter will send 3 times signals to turn on the receivers. If SETTING temperature is higher than room temperature then transmitter will send 3 times signals to turn off the receiver (fire place).
