Subject: RE: Request FCC opinion on Label placement (with additional info)

Hello Mike,

We are approving this based on the prior approval and the main difference is that the regulatory label will be viewable when a user removable keyboard is removed as oppose to under a user access cover. This is a limited approval only for the proposed labeling scheme. The second label indicates placement of the regulatory label under the keyboard. All labels are accessible by the end user. Please note if the above is not correct.

Thanks
