

# Wireless Charger User Guide

Model: C19

## Thank you for purchasing and using this product!

Please read this Operation Instruction carefully and keep it properly before using this product.

### Product Specification

Fast Wireless Charger

- Input: 5V=2A/9V=1.67A
- Output: DC 5V=1.0A, 5V=1.5A, 9V=1.2A
- Charging Efficiency: 75%

### Applicable Devices

Compatible with all devices with Qi Standard

For all other mobiles without Qi Standard, those will be working with wireless receivers.

Wireless charger

Infrared sensor

Driving motor

## Control Button descriptions

Press control button to control infrared sensor.

### Function of control button

Control infrared sensor. infrared sensor is affected by external lights easily, so that the clip open or close automatically.  
(such as: shake of your arm, the light of tunnel , etc.)

## Drop-down Holder Structure Description

compatible for different size of smartphone					
1-class gear position			2-class gear position		
size of phone ≤ 153mm			size of phone > 153mm		
Brand	Model	Length	Brand	Model	Length
Samsung	S6	143.4mm	Samsung	S8+	159.5mm
Samsung	S7	142.4mm	Samsung	S9+	158.1mm
Samsung	S8	148.9mm	Samsung	S10+	157.5mm
Samsung	S9	147.7mm	Samsung	NOTE8	162.5mm
Samsung	S10	149.9mm	Samsung	NOTE9	161.9mm
Samsung	S10e	142.2mm	Apple	iPhone XS Max	157.5mm
Samsung	Note5	153.2mm	Apple	iPhone 8 plus	158.4mm
Apple	iPhone 8	138.4mm	LG	G7	153.2mm
Apple	iPhone X	143.6mm	Huawei	Mate P30 pro	158mm
Apple	iPhone XS	143.6mm	Huawei	Mate 20 pro	158.2mm
Apple	iPhone XR	150.9mm	Xiaomi	Mi9	157.5mm

Wireless charging is made up of wireless charging transmitter and wireless charging receiver (working principle). Wireless charger you bought is transmitter, receiver was built into smartphone. Wireless charging works well when the transmitter coil position is coincided with receiver coil position.

The receiver coil position is fixed for this product. According to different size of smartphone, making receiver coil position to coincide with transmitter's, we design drop-down holder to adjust the appropriate charging position to make wireless charge well.

## FCC Part 15 Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This wireless charger is applicable to all ACRISS Car Classification Category.

When installed properly per instructions, distance between you and the Wireless Charging are as below:

1)When sitting on the driver seat steering car, at least 50cm, 72cm, 83cm, 90cm to Knee, Leg, Body, Head respectively.

2)When Sitting on the front passenger seat, at least 32cm, 43cm, 63cm, 55cm to Knee, Leg, Body, Head respectively.

3)When Sitting at any other available seat excluded by 1) and 2), at least 100cm to all above mentioned parts could be naturally guaranteed.

FCC ID:2AUDO-C19C18C13X

## Installation Steps

### 1. How to install air vents.

Follow the arrows to install 3 parts.

Adjust the screw cap to the best active status.

### 2. Input: Connect the wireless charger and car adapter with the charging cord.

**Must use Qualcomm quick charging adaptor for fast wireless charging.**

### 3. Press the button of clip to fix, then adjust the angle and tighten the fixed nut.

### 4. Place smartphone

#### Press-key control

Press the button, the clips will open, place your phone, clips tighten automatically.

Infrared sensor

#### Infrared sensor control

The levers will open automatically and grip your phone once your phone approach.

### 5. Take off smartphone

Press the key, the clip open automatically, take your phone out.

Press-key

### 6. LED indicator light shows the working status:

- 1.White LED Light: Standby.
- 2.Blue LED Light: Charging normally.
- 3.Red LED Light: Charging abnormally.

LED indicator light

**⚠ The LED light turns red during wireless charging to indicate a charging failure.**

The following situation can cause failures, like charging slowly, stop charging, over-temperature for charging position.

1. The adapter is not run up to standard (No PC USB output power supply).
2. The charging cable is not up to standard.
3. The phone case is too thick ( within 2mm thickness phone case recommended ).
4. The built-in wireless charging receiver position is not coincided with wireless charger coil position.
5. There is metal/magnet on the back of cell phone or phone case.
6. Smartphone does not support wireless charging function.

#### ⚠ Attention

1. Please keep the charger away from water or other liquid.
2. If you need to clean the charger, please make sure it is not connected to power supply.
3. Using Environment temperature remains -20~45°C.
