INDICATOR LIGHTS/KNOB FUNCTION

KNOB FUNCTION

Pluggable knob (can be used instead of Switches)

- Click: Volume+
- Anticlockwise: Volume-
- Press: Mute

Caps Lock

Win Lock

Charging Indicator: On WhiteCharging, Off When Full

Fn blinks at low voltage

BATTERY REMINDER

In BT 2.4G mode, Press and hold **Fn+Enter** to view the battery indicator

For Example:

1. The backlight is bright, indicating that the keyboard is 10% of the power at this time

2. The backlight is on at the same time, indicating that the keyboard is 20% of the power at this time

3. The backlight is on at the same time, indicating that the keyboard power is 100% at this time

WIRED MODE

Recommend: Using 5V 1A Rated power to charge keyboard

BT CONNECTIVITY

Place the switch to "B" side.

Short press **Fn+QWERTY** to change BT channel.

Long press **Fn+QWERTY** to enter pairing mode.

Turn on the Bluetooth of computer/other device, find and link to the keyboard whose name on the list shows as RK2Pro.

2.4G CONNECTIVITY

Place the switch to "G" side.

Short press **Fn+P** to change 2.4 channel.

If the P key flicks slowly, it indicates that your device is successfully linked to the computer (driver installed). The receiver is factory paired and does not need to be paired again.

DFU MODE

There are two methods to enter dfu mode (development Firmware upgrade) on the keyboard:

Method 1: Press and hold the switch located under the space bar, and then connect the keyboard to the computer.

Method 2: Connect the keyboard to the computer first, and then simultaneously short press **Fn + Right Shift + Esc**.

These methods allow you to activate the DFU mode on the keyboard, enabling firmware upgrades and development functionalities.

The keyboard can support VIA drivers: <https://usevia.app/>

BACKLIGHT CONTROL

In USB mode, the backlight brightness is brightest by default

In wireless mode, the backlight is slightly dimmer by default
