

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of the EUT housing and board. The green printed circuit board (PCB) is visible, featuring various electronic components and the 'LOCKLY' brand name. The silver metal housing is partially disassembled, revealing the internal structure. A black ruler is placed vertically on the left side of the components for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT housing and board from a different perspective. The silver metal housing is open, revealing the internal structure and components. A black ruler is placed vertically on the left side of the components for scale.

EUT Housing and Board View 3	 A photograph showing the internal components of a mobile phone housed in a clear plastic casing. The components include a green printed circuit board (PCB) with various electronic components, a black battery labeled 'CHF', and a black antenna. The phone is placed on a blue surface next to a black ruler with white markings in millimeters and centimeters.
Solder Board-Component View 1	 A close-up photograph of a green printed circuit board (PCB) component. The board is populated with various electronic components, including a central microcontroller unit (MCU) and several surface-mount components. The board is placed on a blue surface next to a black ruler with white markings in millimeters and centimeters.

Solder Board-Component View 2	 A photograph showing the back of a green printed circuit board (PCB) with a large black rectangular component, likely a battery, mounted on it. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, showing measurements from 0 to 100 mm.
Solder Board-Component View 3	 A photograph showing the front of a green printed circuit board (PCB) populated with various electronic components, including resistors, capacitors, and integrated circuits. The board has a large circular cutout in the center and is branded with "LOCKLY" and "20200322". It is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, showing measurements from 0 to 100 mm.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '210114', positioned against a blue background. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The PCB features various electronic components, including a small blue capacitor, a black integrated circuit, and several surface-mount components. The board has a central circular cutout and several mounting holes.
Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled 'LOCLY', positioned against a blue background. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The PCB features various electronic components, including a small blue capacitor, a black integrated circuit, and several surface-mount components. The board has a central circular cutout and several mounting holes.

Solder Board-Component View 6	 A photograph showing a green printed circuit board (PCB) component with a complex microchip and various soldered components. The board is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). A white cable is connected to the top of the board.
Antenna View	 A photograph showing the internal components of a device, specifically the antenna assembly. A red box highlights a component labeled "YJ-PG0728-BT-V03". A red line points from the label "BLE Antenna" to this component. The device is housed in a black plastic enclosure.
