

Combiners used for Airgo antenna port measurements, carbus products

Frequency Band	(2) Combiner loss	Cable loss
2.4 GHz	6.8 dB	0.8 dB
5 GHz	7.5 dB	1.3 dB

NOTE: Tests were performed with only one band (2.4 GHz or 5 GHz) operational at a time. The test set-up shown was employed as a matter of convenience, so that attachment to carbus antenna ports would be made only once, minimizing wear and tear to connectors.
