***FCC Query: External photos shows L, R antennas; SAR report has A, B antenna ports – what is correspondence?***

1. The external photos exhibits shows antenna – L & R.

The Left antenna connects to Auxiliary antenna port (as marked on WLAN). The SAR test report has therefore been updated to show that antenna 'B' is actually the Auxiliary antenna.

The Right antenna connects to Main antenna port (as marked on WLAN). The SAR test report has therefore been updated to show that antenna 'A' is actually the Main antenna.

Updated SAR test reports M050753\_Cert\_WM3B2915ABG\_SAR\_2.4 & M050753\_Cert\_WM3B2915ABG\_SAR\_5.2 have been uploaded today as exhibits – RF Exposure Information.
