Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'D0126H Ver1.0 2019 04 22', placed on a blue textured surface. The component features various electronic components including a microcontroller, resistors, and a connector. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled 'D0126H Ver1.0 2019 04 22', placed on a blue textured surface. The component features various electronic components including a microcontroller, resistors, and a connector. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', showing its soldered side. The component is rectangular with various electronic components, including two large integrated circuits (chips) and several smaller surface-mount components. It is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 70. A vertical ruler is also visible on the left side of the component, showing measurements from 0 to 50 mm.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled '5', showing its other side. This side appears mostly empty with visible solder pads and some small components. It is positioned on the same blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. A vertical ruler is also visible on the left side of the component, showing measurements from 0 to 90 mm.
