Subject: 回信: RE: Solve the comment *(FCC ID H8NWLL4070 & IC ID 1353A-WLL4070, 940203L01)

Dear Steve

Please see our reply as below:

Question #1: User manual P59, the warning language seems conflict with the rule. Please revise the warning language.

Page 59 If the end product integrating this module is going to be operated in 5.15 ~ 5.25GHz frequency range, the warning statement in the user manual of the end product should include the restriction of operating this device in indoor could void the user's authority to operate the equipment.

Answer: We correct the waring statement on p59 of the user's manual.

Question #2: Page165 of Test Rpt -247 (3) _H8NWLL4070.pdf, calculation of the pass margin for the attached bandedge plots is missing. Please supply.

Answer: The test report is correct, since there is no restrict band nearby 5.7G band.

Please check and thanks for your assistance!

Best Regards

Wendy Liao
