Pic. 1

4 Add device

**A.Quickly way**

Open "Smart Life" APP, Turn on the Bluetooth on your mobile phone, and grant the corresponding permission to the "Smart Life" APP. Click the "Add" button.

If the dialog box does not pop up you can click the "+" icon or "Add Device" button on the home page, and the camera will be searched, then click the "Add".

Enter Wi-Fi name and password, then click the "Next"(Camera only support 2.4GHz)

Wait for the camera to automatically complete network configuration.

**B.QR code way**

Open "Smart Life" APP, click "+" on the top right corner of the page "HOME", then select "Smart Camera (2.4G)",

Make sure the indicator is flashing or a prompt tone is heard. Then press "Next".

Enter wifi name and password, then press "Next"

Scan the QR Code on your phone with camera. Insert a prompt tone, then press "I Heard a Prompt"

Wait for the network configuration completing

\*Please refer to the specific APP interface if there are any difference. You can find much more useful information in the Help Center on APP.

**Frequently Asked Questions**

1 Can I share with family and friends?

Yes, you can share your cameras with family and friends who will have access to view the camera and control your bulbs, plugs, and other devices. In the app, press the Profile button and click on the "Share Management" button, and you will be able to give or revoke sharing permissions. In order to share, the other user should already have downloaded the app and registered a new account.

2 What's the Wireless Range?

The range of your home Wi-Fi is heavily dependent on your home route and the conditions of the room. Check with your router specifications for exact range data.

3 How many cameras can I control?

Smart Life app can control an unlimited amount of devices in an unlimited amount of locations. Your router may have a limit of how many devices can be connected to one router.

4 My device can't be connected to network with App

- Make sure the device is under the config status (Indicator light is flashing quickly)
- Make sure the Wi-Fi is available and not too far away from router
- Make sure the Wi-Fi password you typed is correct

5 My device shows offline in my App

- Make sure the device is powered on
- Make sure the network is stable and the Wi-Fi name and password not modified. If not, add device again.
- If the network is normal, but it's still offline. Check if there are too many Wi-Fi connectors. You can restart your router to check the status of the device.

6 Installation Instructions

- Take out all accessories and arrange them in order
- Refer to fit bracket size,fill these holes on the installation area,such as the wall, ceiling, etc.. Press the mounting bracket on the installation area.(Drive all three expansion screws in sequence to fully secure the base.

Align the bottom of the camera's main body and aim to the right angle. Then rotate and snap it into the base until it is completely fixed.

Use the USB cable to connect the camera and the adapter, then connect the socket to power the camera, and see the camera indicator light on.
