

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment, likely a spectrum analyzer or a power supply, sits on a wooden workbench. A red cable is connected to it and runs down to a device on the floor. This device has a red emergency stop button and several other ports. It is plugged into a power strip on the wall. To the right is another wooden workbench with some small white components on it.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup inside an anechoic chamber. The walls are covered with white, square-shaped electromagnetic absorbers. In the center, a small white table holds a device being tested. In the foreground, there is a metal frame structure, possibly for a probe or antenna. The floor is dark and has yellow and black safety tape markings.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
