GENERAL WARNING & CAUTIONS

The back module (part B) needs to be protected from weather.

Tools Required (not included)

**DO NOT USE
POWER DRILL**

Left Handed & Right Handed Setting

When entering the doorway, if the hinges are on the left, turn the button into 1 on back module. If the hinges are on the right, turn the button into 2 on back module (Part B).

Battery Precautions

- Do not mix old with new batteries.
- Do not use rechargeable batteries.
- Remove batteries from product when storing for extended periods of time.
- Do not dispose of batteries in fire as they may explode. Please follow your local battery disposal procedure.
- Do not puncture batteries. Electrolyte leakage from the batteries is corrosive and can cause serious harm to the eyes or skin. If swallowed, the electrolyte can be toxic.
- Do not allow conductive materials such as jewelry or metal tools to make contact with the batteries which may cause a short circuit. With a short circuit, the batteries and conductive material can become extremely hot and cause burns.

Introduction

Along with the YoLink App, connect the Smart Lock M1 to your home network. After set up the Smart Lock M1, you will be able to lock or unlock your door, manage different user password with internet connection.

LED lights can show you the current status. See the explanation below:

Features

Three Ways to Unlock - YoLink App, password and key.

- A YoLink Hub.
- A smartphone or tablet running iOS 9 or higher; Android 4.4 or higher.

Set Up YoLink Smart Lock M1

Follow the steps below to set up your YoLink Smart Lock M1 via YoLink App.

Step 1: Set up YoLink App

- Get the YoLink App from the Apple App Store or Google Play.

Step 2: Log in or sign up with YoLink account

- Open the App. Use your YoLink account to log in.
- If you don't have a YoLink account, tap **Sign up for an account** and follow the steps to sign up an account.

Step 3: Add device to YoLink App

- Tap the “

The diagram illustrates the process of adding a device to the YoLink App in three stages:

 - Initial State:** A smartphone screen shows the 'Rooms' section with a list of rooms (All Devices, Kitchen, Living Room) and a 'No Device' message. A dashed line connects the 'Add Device' button to a physical YoLink Smart Lock M1 device.
 - Add Device Screen:** The app displays the 'Add Device' screen with fields for Name, Room, and Favourite. The 'Name' field is pre-filled with 'Smart Lock M1'. The 'Room' field is set to 'Not Set'. The 'Favourite' field is set to 'Will show in Favourite screen'. A blue 'Bind device' button is at the bottom.
 - Final State:** The 'Add Device' screen is shown with the 'Bind device' button highlighted by an orange box, indicating the final step in the process.

Step 4: Connect to the cloud

- Power on the smart lock using the supplied batteries and your device will connect to the cloud automatically.

Note

- Follow the **Installation** to install the device first.
- Make sure you hub is connected to internet.

Installation

Step 1: Adjust Latch Backset

Rotate the buckle anticlockwise to adjust the latch backset.

Step 2: Install Door Latch

Step 3: Mount Front Module

Step 4: Fasten Back Mounting Plate

Step 5: Mount & Fasten Back Module

Step 6: Install Battery Cover

Using YoLink App with YoLink Smart Lock M1

- Factory reset will be done when the UNLOCK button light stops flashing.

Specifications

Password:	30 user passwords, 1 admin password, 1 visitor password
Voltage:	6V DC (4 - AA Battery)
Alert Voltage:	5.46V DC
Working Power Consumption:	<1.4A
Standby Power Consumption:	< 80uA
Environment:	working Temperature: 0°C~40°C (32°F~104°F) working Humidity: 10%~90% non-condensing

Troubleshooting

Batteries: over 60% of issues are discovered to be battery related. The best thing to do is purchase a set of brand new “AA” alkaline batteries to install in your door lock. You will save yourself a lot of trouble.

Door Jamb Alignment: Make sure the deadbolt and the hole in the door jamb line up so that there is minimal resistance on the deadbolt as it extends into the door.

Driver Bar Position: In step 3 of the installation, you are instructed to Position the driver bar in the vertical Position while the deadbolt is retracted. In step 5 of the installation, you are instructed to Position the thumb turn according to which side the door latch faces. If these parts are not Positioned according to the instructions, you will encounter issues such as the lock only working with the key in the cylinder, a jammed thumb turn, or a key that will not release from the cylinder. The best thing to do is remove the lock from the door and install the lock according to the instructions provided.

Keypad: If not connected securely, the keypad wire harness connection may come loose and cause some of the numbers to operate inconsistently. To confirm your door lock issue is not being caused by a loose keypad connection, press every number on the keypad and confirm every button beeps when pressed.

If some of the numbers are not beeping, remove the back module (part B) and inspect the wires for any pinches or tears. Make sure to check the wires coming from the keypad as well. Disconnect the wire harness and make sure the pins in the male connection are not bent out of alignment. Reconnect your wires and confirm every button on the keypad beeps when pressed.

If you are still having keypad issues after following our troubleshooting guide, call us for a replacement under warranty.

Function Test: Admin password can be set via lock only, and the user password can be set via YoLink App only.

1. Unlock the door lock and open the door. Make sure you keep the door open while troubleshooting.

2. Press the LOCK button on the keypad 1 time and listen to the beeps:

- If the lock produces a long set of rapid beeps and either locks or does not lock the door, you have low batteries. Replace the batteries with a set of 4 premium “AA” alkaline batteries.

- If the lock beeps 2 times and locks successfully, it has at least 1 password stored in its memory and is operating correctly.

3. It shows the lock is offline on YoLink App:

- If hub is offline. Reconnect your hub to the Internet and press the “S” button of smart lock once.

- If hub is powered off. Power on the hub again and press the set button of door sensor once.

- If you have low batteries. Replace the batteries with a set of 4 premium “AA” alkaline batteries.

- Product defective. Contact customer service.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference.
- 2) This device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

“To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.”
