

DURATION OF RF TRANSMISSIONS

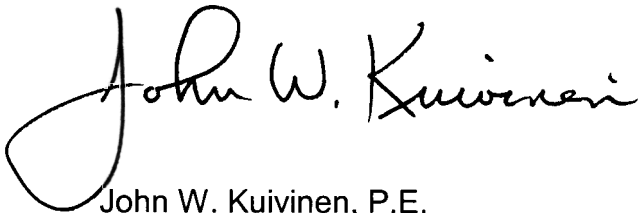

GT-30

REMOTE REMOTE CONTROL TRANSMITTER

The transmitters are manually activated. They are used only for remote control of a garage door or gate system. As such they may be operated continuously by the user (FCC Rules 15.231(a)(4)).

Power will be removed from the RF exciter immediately after the release of the manual push button. The unit will then cease transmission. FCC Rules 15.231 (a)(1) allows no longer than 5 seconds upon the release of a manually activated transmitter.

Signed:

A handwritten signature in black ink that reads "John W. Kuivinen". The signature is fluid and cursive, with a large loop at the beginning of the first name.

John W. Kuivinen, P.E.
Regulatory Compliance Engineer
