RE: FCC ID: PDNRM-1_ATCB001652
Attention: Asko Välimäki

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please provide a block diagram of the actual BT module as required by 2.1033. This Block diagram should show the clocks, frequencies and data paths for the module.
2. Please note that the SAR information in the manual states 'international' limits. Please note that devices sold in the US must meet US SAR limits, which are lower limits than the 2w/kg you mention. Please refer to compliance to the US limits.
3. Please note that the manual is incomplete in the SAR statements as it states, "The highest SAR value for this device when tested for use at the ear is XXX W/kg." Please complete the statement by placing that actual measured SAR values.
4. Please note that the calibration files mentioned in the Body of the SAR report have not been provided. Please provide the calibration data for the probe and the verification dipole calibrated at the proper frequency.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
