

Early Light Industrial Co., Ltd

Project No. : #3841

Model Name :RC BLOO

Frequency : 27.145MHz

Date : 25 Aug,2006

FAX: (HK) 852-24136147

Prepared By : JLQ

(China) 86-755-84651111 EXT:468

REV : 00

TX CIRCUIT DESCRIPTION:

While press either SW1,SW2, SW3,SW4 or SW5, the transmit frequency is oscillated by Y1 and mixed with the encoded signal in U1 then send out from the RFO port(pin5). The modulated signal coupled to antenna via C3,L4 and L1.

C3,C5,L4& C8 compose the low pass filter, which can pass the signal to the antenna smoothly.

2 pieces of AA size Alkaline Battery supplies energy
