**FCC ID: NTAXMETER3**

**In reply to e-mail dated October 10, 2002**

Dear Mr. Johnson,

Below are the answers to your questions.

1. Please find an updated label information in "Label TMW-40Drev" file, submitted via "Add to existing application", Label location folder on October 14, 2002.

2. Tadiran Telematics wrote: *We confirm that the sticker uses adhesive, designed to withstand the environmental conditions seen by the device and to last its expected lifetime.*

*The tapes to be used are copper tapes 3M 1181, or PPI 9115 or compatible with adhesion properties tested in accordance with ASTM D-1000. The adhesive used for the specific application is based on acrylic and defined as water resistant and resistant to detergent, gasoline, motor oil (chemical resistance). The stickers with this adhesive will be supplied as a part of the meter installation kit.*

3. Please find an updated User Manual, submitted via "Add to existing application", Users manual folder on October 14, 2002.

With great respect,

Valeria
