

YOUR SMART DEVICE CAN DO MORE

User Manual

Sengled Smart Light Switch

Model: E1E-G7F

Introduction

Sengled Smart Light Switch enables customers to control either bulbs or whole rooms with the click of a button. The Switch means no more digging or searching for your phone when needing to control your lights, as well as having your favorite scenes pre-set to your Switch, so you can always switch to your favorite scenes when you want to.

Note: A hub is required to control the Smart Switch.

Features

- Wireless control
- No wiring required
- Easy group control
- Pre-set your favorite scenes
- Supports Zigbee 3.0

Package Includes

- One switch remote
- One wall mount
- 3M tape x2
- Screw x2
- CR2032 Li battery
- User guide

Product Specifications

- Power supply: 3V DC(battery type Li+ CR2032)
- Operating temperature: 0°C~+40°C/32°F~104°F
- Operating humidity: 0% ~ 95%
- Battery life: 3 years
- Dimensions:

Switch	36 mm (1.4") x 90 mm (3.5") x 10 mm (0.39")
Wall mount	74 mm (2.9") x 118 mm (4.6") x 9 mm (0.35")
- Wireless Zigbee 2.4GHz (2405~2480MHz,802.11b/g/n).

Important Safety Information

Before installing the Sengled Smart Light Switch, please read and follow precautions, including:

- Do not attempt to disassemble the Switch.
- Suitable for use in operating environment between 0°C and 40°C(32°F

and 104°F).

- Indoor use only. Do not use where directly exposed to water.

Installation Instructions

Note: If you plan to mount your Switch to a wall, Sengled recommends ensuring you can add your Switch to your Sengled Hub before attaching it to your wall.

1. Download the latest version of the Sengled Home App from the Apple App Store or Google Play Store.
2. Register and sign in to your Sengled account using Sengled Home App.
3. Open the Sengled Home App, go to Devices, select the + sign, and choose Smart Light Switch. Follow the instructions to finish installation.

Note: Please do not remove the “Remove to Pair” tab before you are ready to pair your Switch to the hub as you will only have one minute to successfully pair after removing the tab. If you are unable to pair, please follow the reset instructions on the next page before attempting to pair again.

4. Ensure your Sengled Home app can discover the sensor.

Congratulations on successfully installing your Smart Lightstrip!

Reset Instructions:

To reset your Switch, please hold down the ON and OFF buttons at the same time for at least 3 seconds. The indicator light will start flashing, indicating a successful reset. Please try to connect it to your hub at this point; you will have one minute from when it starts flashing to connect.

Operation

The following section outlines the operational modes of the Sengled Smart Light Switch. These can be set via your Sengled Home app.

On

single click, double click, long press

turn on lights (user-defined)

Off	single click, double click, long press	turn off lights (user-defined)
Brighten/Dim	single click, long press	dim up/down lights

CAUTION

- **INDOOR USE ONLY**
- **DO NOT USE WHERE DIRECTLY EXPOSED TO WATER.**

FCC ID: 2AGN8-E1EG7F

IC: 20888-E1EG7F

Federal Communications Commission (FCC) Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RF exposure warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

IC Radiation Exposure Statement for Canada

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation

est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit

accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement. Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut

fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

User manuals for transmitters equipped with detachable antennas shall also contain the following notice in a conspicuous location:

This radio transmitter (identify the device by certification number, or model number if

Category II) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio (identifier le dispositif par son numéro de certification ou son numéro de modèle s'il fait partie du matériel de catégorie I) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette

liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

IMPORTANT NOTE:

Radiation Exposure Statement:

This equipment complies with "Industry Canada RSS-102 for radiation exposure limits set forth for an uncontrolled environment".
